

Hand-pressed Fabric Sample Cutter

Model: FT-100CM2

User Manual

Uses: Widely used in cutting and sampling of knitwear, textiles, leather, paper products, aluminum foil and other products.

Advantages: high sampling accuracy, long tool life

Instructions for use:

1. Children under the age of 18 are strictly prohibited from using it.
2. This is a single-person-operating machine to avoid accidents of cutting hands.
3. The cutter and the chassis have been adjusted to the best position. It is not advised to adjust the machine without permission because it will result in inaccurate precision and affect the cutting efficiency.

Specifications:

Cutting area: 100cm²
Cutting thickness: 0.1mm-10mm
Machine size: 335*235*540mm
Blade size: diameter 112.84mm (circle area = 100 cm²)
Outer packing size: 410*390*280mm
Including 2 cutting pads
Total weight: 14KG

Instructions:

Place the machine on a flat and hard work surface. Place the PVC pad in the center of the machine chassis. Place the textile fabric or paper flat on the PVC pad, then retract your hand. Press down the lever gently and then gently release the fabric sample to complete.

Precautions:

1. The edge of the blade on the sample cutter is very sharp. Do not put your hands on the bottom during use to prevent injury.
2. The cutter and the chassis have been adjusted to the best position. Do not adjust without permission, which will affect the cutting efficiency.
3. Replacing the blade: Loosen the screw on the blade, turn the blade, and remove the blade. Just replace it with a new blade.
